I have 100% compatibility of GTA 5 on PC with.Q: I want to call a function on the click of a button, but the function is on a different form I am trying to call a function which is on a different Form, from another Form via a button in that same Form, but am getting an error. I can call the function if I try to call it from the Form from which the button was clicked from, but I can't seem to call it from the Form in which the button lives. I'm new to VB.Net. Could someone explain to me what I'm doing wrong, and how to fix it? Ex: This does not work: Private Sub btnTestCall_Click(sender As Object, e As EventArgs) Handles btnTestCall.Click Call ScreenAuctionsForm.ShowDialog() End Sub But this works: Private Sub btnTestCall_Click(sender As Object, e As EventArgs) Handles btnTestCall.Click ScreenAuctionsForm.ShowDialog() End Sub Can you please explain why? Thanks. A: I'll assume that the name of the Form in which you want to call the ShowDialog is ScreenAuctionsForm. You need to make a reference to the form in order to be able to access the dialog: ' Assume that you declared a public function in ScreenAuctionsForm.vb Public Function IsPopupVisible() As Boolean 'Do what you need to do to determine if the popup dialog is visible. Return True End Function And then from Form2: Imports ScreenAuctionsForm ' In the button click event handler of Form2 ScreenA
